Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 27-43, drawn to a nucleic acid encoding a protein that is variant of SEQ ID NO:2 that has resistance to a PI, and vectors and cells comprising it.

Group II, claim(s) 44, drawn to a method comprising contacting a nucleic acid encoding a protein that is variant of SEQ ID NO:2 that has resistance to a PI with an agent.

Group III, claim(s) 45-51, drawn to a protein that is variant of SEQ ID NO:2 that has resistance to a PI.

Group IV, claim(s) 52-54, drawn to an agonist of a protein that is variant of SEQ ID NO:2 that has resistance to a PI.

Group V, claim(s) 55-62, drawn to plants and seeds producing an agonist of a protein that is variant of SEQ ID NO:2 that has resistance to a PI.

Group VI, claim(s) 63, drawn to a method comprising contacting a protein that is variant of SEQ ID NO:2 that has resistance to a PI with an agent.

Group VII, claim(s) 64-65, drawn to an antibody that binds to a chymotrypsin or variant thereof.

Group VIII, claim(s) 67-68, drawn to a polynucleotide that is antisense to a nucleic acid encoding a protein with 75% similarity to SEQ ID NO:2.

The inventions listed as Groups I-VIII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The technical feature linking Groups I-VIII appears to be proteinase resistant proteins.

However, Mazumdar-Leighton et al (2001, Insect Biochem. Mol. Biol. 31:633-644) teach proteinase resistant proteins and nucleic acid encoding them (see abstract). Thus, claim 27, among others, is not novel.

Therefore, the technical feature linking Groups I-VIII is not special and the Groups are not so linked under PCR Rule 13.1.

Applicant is advised that for the reply to this requirement to be complete, it must include (i) an election of an invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out the supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be present at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of the right petition under 37 CFR 1.144.

Should Applicant traverse on the ground that the inventions are not patently distinct, Applicant should submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. In either

instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a refection under 35 U.S.C. 103(a) of the other invention(s).

If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
